

Qora

Smart Queue Management Platform for Bangladesh

Product Vision

Qora is a cloud-based Queue Management System designed for Bangladesh that helps hospitals, diagnostic centers, banks, government offices, and customer service centers reduce waiting time, improve customer experience, and gain operational insights.

Phase 1: Foundation & MVP

Module 1: Organization Management

Features

- Organization Registration
 - Branch Management
 - Department Management
 - Counter Management
 - User Management
 - Role & Permission Management
 - Subscription Management
 - bKash Payment
 - Nagad Payment
 - Billing & Invoices
-

Module 2: Queue Management

Features

- Queue Creation
- Queue Categories
- Multiple Queues
- Queue Priority
- VIP Queue
- Emergency Queue
- Queue Transfer
- Queue Hold
- Queue Recall
- Queue Skip

- Queue Cancellation
 - Queue History
-

Module 3: Token Management

Features

- Auto Token Generation
- Manual Token Creation
- QR Token
- Mobile Token
- Printed Token
- Token Prefix Configuration
- Daily Token Reset
- Department-wise Token Series

Example:

A-001 A-002

B-001 B-002

Module 4: Counter Management

Features

- Counter Open
 - Counter Close
 - Next Call
 - Recall Token
 - Transfer Token
 - Counter Status
 - Counter Performance
 - Active Queue View
-

Module 5: Queue Display System

Features

- Web Display
- Android TV Display
- Fullscreen Display
- Queue Number Display

- Counter Display
 - Waiting Count
 - Estimated Wait Time
 - Custom Branding
-

Module 6: Voice Announcement

Features

- English Voice
- Bangla Voice
- Custom Voice
- Counter Announcement
- Repeat Announcement
- Department Specific Voice

Example:

"Token 25, please proceed to Counter 3"

"টোকেন ২৫, কাউন্টার ৩ এ আসুন"

Module 7: QR Check-In

Features

- Scan QR
 - Join Queue
 - Select Service
 - Mobile Verification
 - Queue Confirmation
 - Digital Token
-

Module 8: Notification System

Features

- WhatsApp Notification
- SMS Notification
- Email Notification

Events:

- Queue Joined
 - Near Turn
 - Called
 - Missed
 - Feedback Request
-

Module 9: Dashboard

Features

- Live Queue Count
 - Active Counters
 - Waiting Customers
 - Average Wait Time
 - Service Time
 - Completed Tokens
 - Missed Tokens
-

Module 10: Analytics

Features

- Daily Report
 - Weekly Report
 - Monthly Report
 - Peak Hour Analysis
 - Counter Performance
 - Staff Performance
 - Queue Trends
 - Wait Time Analysis
 - Service Time Analysis
-

Module 11: Customer Feedback

Features

- Star Rating
 - Feedback Form
 - NPS Score
 - Satisfaction Analytics
-

Phase 2: Hospital Edition

OPD Queue

Features

- Doctor Queue
 - Department Queue
 - Appointment Queue
 - Walk-In Queue
-

Diagnostic Queue

Features

- Sample Collection Queue
 - Test Queue
 - Lab Queue
-

Report Collection Queue

Features

- Report Delivery Queue
 - Notification System
-

Pharmacy Queue

Features

- Prescription Queue
 - Medicine Collection Queue
-

Patient Journey Tracking

Patient Flow:

Registration → Doctor → Lab → Billing → Pharmacy

Phase 3: Bank Edition

Service-Based Queue

Features

- Deposit Queue
 - Withdrawal Queue
 - Loan Queue
 - Account Opening Queue
 - Card Service Queue
-

Priority Queue

Features

- VIP Customers
 - Senior Citizens
 - Disabled Customers
-

Branch Dashboard

Features

- Branch Comparison
 - Queue Analysis
 - Performance Metrics
-

Phase 4: AI & Automation

Smart ETA Prediction

Features

- Real Wait Time Prediction
- Queue Forecasting

Example:

Current Position: 12

Estimated Wait: 18 Minutes

Smart Staffing

Features

- Counter Recommendations
- Peak Hour Detection

Example:

"Open 2 More Counters"

Customer Flow Analytics

Features

- Bottleneck Detection
 - Service Optimization
-

Unique Features (Qora USP)

Bangla First

- Bangla UI
 - Bangla Voice
 - Bangla Reports
-

WhatsApp First

- Join Queue
 - Notifications
 - Status Updates
-

No Hardware Required

Works With:

- Browser

- Android TV
- Tablet
- Mobile

No expensive token machine required.

Bangladesh Payments

- bKash
 - Nagad
 - Bank Transfer
-

Self-Service SaaS

Customer Flow:

Signup → Pay → Create Branch → Start Queue

No sales call required.

Development Pipeline

Stage 1: Research & Planning (1 Week)

Deliverables

- Market Research
 - Feature List
 - Competitor Analysis
 - PRD
 - ERD
-

Stage 2: System Design (1 Week)

Deliverables

- Database Design
- API Design
- Permission Structure
- Multi-Tenant Architecture

Stage 3: UI/UX Design (1 Week)

Deliverables

- Dashboard UI
 - Queue Screen UI
 - Counter Screen UI
 - Display Screen UI
-

Stage 4: Core Development (4 Weeks)

Sprint 1

- Authentication
- Organization
- Branch
- User Management

Sprint 2

- Queue Management
- Token Management
- Counter Management

Sprint 3

- Display System
- Voice System
- Notifications

Sprint 4

- Dashboard
 - Reports
 - Analytics
-

Stage 5: Testing (1 Week)

Deliverables

- Unit Testing
 - Integration Testing
 - Load Testing
-

Stage 6: Beta Launch (2 Weeks)

Target:

- 1 Hospital
- 1 Diagnostic Center
- 1 Bank Branch

Collect feedback and improve.

Recommended Tech Stack

Backend:

- ASP.NET Core 9 Web API

Database:

- PostgreSQL

Frontend:

- React + TailwindCSS

Real-Time:

- SignalR

Cache:

- Redis

Queue Jobs:

- Hangfire

Hosting:

- Hetzner / Contabo VPS

Notifications:

- WhatsApp API
- SMS Gateway

Payments:

- bKash API
 - Nagad API
-

Version 1 Launch Scope

1. Organization Management
2. Queue Management
3. Token Management
4. Counter Management
5. Display System
6. Bangla Voice
7. QR Check-In
8. WhatsApp Notifications
9. Dashboard
10. Analytics
11. Customer Feedback
12. bKash/Nagad Billing

Target Customers:

- Hospitals
- Diagnostic Centers
- Banks
